AUPE 

PATIENT FOOD SERVICES

Have you seen the new cafeteria food? Things really went downhill after AHS fired our coworkers and contracted-out retail food services.

That's why my job in patient food services is so important. AUPE members like me are specially trained to help Albertans with their dietary needs during their hospital stay.

We are proud of what we do. Contracting-out our jobs would make things worse for patients.

Albertans can't afford to lose more hospital food services.

Let's support each other and stand up for public services.
