

Bill Ginther responses
Candidate for Lethbridge City Council

1. My feelings are a bit mixed on this one but having said that I'm not in favour of more and more government "control". I do feel however, that privatization of municipal services and infrastructure would not be a benefit to either our civic government or our employees. I'd definitely support bringing back previously privatized services and keeping them in-house.
2. A living/fair and equitable wage is an absolute must along with all other job security related concerns.
3. Again, government control is something I strongly dislike so I would oppose all attempts to legislate against municipal staff...
4. I would always oppose spending cuts (to essential services in particular) and i think we need to be much more efficient in how we spend tax dollars.
5. As much as I don't like mask mandates, i see them as one of the only way we can make a dent in the ever increasing COVID numbers
6. I think anything that makes services (such as transit) more accessible to all, we should do that
