

**Calvin Campbell responses**  
**Candidate for Red Deer City Council**

1. Yes. I oppose privatization. As a fellow union member I see first hand how profits, over service and fair benefits, eventually erodes unions and members moral.

2. Yes. Fair wages, full time positions, less casual schedules and less contracting out are essential to a strong and respected workforce.

3. Absolutely. Union bashing and clawing back rights and benefits are an attack on a dedicated and hard working membership.

4. The municipality must demand that any budget shortfall be made up by the higher levels of government. We cannot tax our community any further to maintain vital services.

5. I cannot support mandatory vaccination. I see first hand how this personal decision puts members jobs at risk for non compliance and divides brothers and sisters.

Masks and hand sanitizer, support one another.

6. We need to encourage all wage classes to use public transportation. It is a vital resource and should be expanded with a graduated fee scale so low income families can rely on safe affordable transportation to work and enjoy all of their community.
