Answers as follows :

1.As Mayor one must look after all sectors of the work force and the economy both private and public and we must find balance , the attitude that one sector be it Public is more important than the other is wrong

An attitude we are in this together "has balance"

2.As Mayor my priority is to create a thriving business hub once again that includes the employment of public and private sector jobs but we must manage our municipality responsibly , it's the taxpayer who has the final say

3.As Mayor we must work with the public and private sector within the boundaries of the law and bargain in good faith keeping in mind we are in this together

4.As Mayor my main platform criteria is an independent audit on all city expenditures to make transparent to the taxpayer where the money is going and how it should be spent by way of plebiscite

5.As Mayor I support the doctors nurses and Frontline workers and all support staff an urge everyone to be vaccinated to reduce risk and assist the Health care providers

6.As Mayor my platform calls on a plebiscite on our LRT spending it's the taxpayers money and they should have a say where is spent.

In Closing I support both the private and public sectors and we must alter our path that perpetuates our current municipal nightmare
