

**Ryan Laloge responses**  
**Candidate for Red Deer City Council**

1)yes,no

2)yes

3)yes

4)if municipalities do the job properly the growth should be year after year. If city declines in size and revenue drops. Cuts should be made so the tax burden on it's citizens isn't extreme.

5) it's important too listen too the health experts. I choose too social distance and wear a mask. However in no way shape or form will I ever support vaxx pass or lock-downs. I am vaccinated. The division that has occurred is due too the lack of real leadership at provincial and federal governments. People should be able too choose what's right for them and not be shamed into it. They have had 2 weeks 18 times now in order too figure it out. I support each individual choices in order to get through this with how they choose on their own. Financially it has been hard on people. Governments should be covering full wages if people are doing the right thing not just half. Otherwise what's the incentive too follow the rules that they have dictated too employers and employees. Sorry ranting about this again.

6) yes
