

## **Zaheed Ali Khan responses**

### **Candidate for Mayor of Calgary**

1. I am for p3s as it delivers a quicker mandated sub system to economical and inexpensive infrastructure costs. The citizens deserve a quicker build rate time shortening traffic and time on roads. I believe we could create more municipal jobs this way as well by mandating it in a code .
2. I believe the municipality can provide insurance and benefits to all municipal staff.
3. I will not oppose anything that infringes on the right of civilians.
4. I am for taking 10 percent back from the provincial government in property taxes to put back into our shortfalls. Plain and simple we should not have any.
5. I don't support vaccine passports and or vaccination cards as this is not Nazi Germany. We are living organisms it is survival of the fittest if you choose to get a vaccination that is your God given rights.
6. We are on a very great path to reduce the transit fees and or fares as it should be are part of municipal bottom line costings.
